JOB TITLE: Renewable Energy Education Project (REEP) Research Intern

DEPARTMENT: Geography and the Environment

ADDRESS: 310 Carole Weinstein International Center  TELEPHONE: 287-6307

SUPERVISOR: Mary Finley-Brook

JOB SUMMARY: The interns will provide research and teaching support on climate change policy and renewable energy projects as well as assist with community and campus outreach. Specifically, the student workers will (1) contribute to the creation of an on-line resource center, and (2) document and communicate progress towards on-campus renewable energy options at UR and other institutions of higher education.

SPECIFIC DUTIES:
1. Assist with student, faculty, staff, and community outreach and education related to renewable energy
2. Help build an on-line database of renewable energy research and resources
3. Conduct research about on-campus renewable energy options (solar, wind, geothermal, etc.)

QUALIFICATIONS:
1. Must either (1) have taken classes in Geography, Environmental Studies or another related field or (2) have relevant volunteer, internship or work experience
2. Excellent computer skills with knowledge and experience with Blackboard, MS Excel, MS Word, and PowerPoint. GIS skills are viewed positively but are not required.
3. Research (library and on-line) skills
4. Strong organizational skills
5. Attention to detail
6. Ability to work independently and pro-actively to complete assignments
